Your One Stop Shop For All Your Construction Needs

We have the largest walk-in order desk in the state of California. If you are not sure of exactly what you need, our professional staff can assist you in creating and coordinating your openings and hardware needs.

Who are we?

As part of the Thompson Building Materials family, Thompson Door & Frame has been a leading distributor and material supplier of doors, frames and finish hardware for more than 30 years.

What do we do?

We are a full service supplier of hollow metal doors & frames, Timely pre-finished steel frames and commercial wood doors. In addition to commercial doors and frames, we also carry a large inventory of door hardware accessories including vision lite kits, louvers, hinges, locks, door closers, exit devices, thresholds and weather stripping.

Who do we serve?

We can service anyone with a commercial door, frame and hardware need. We maintain two different sales departments to ensure that you receive the appropriate level of support you need to get the job done.

Our first department is the sales order desk. This is where the "walk-in" customer can purchase door and frame stock items or order a custom wood, hollow metal or Timely opening or accessory. Our massive inventory combined with our state-of-the-art wood and metal shops allow us to offer one of the fastest turn times in the industry. In most cases we can complete a custom opening in 72 hours or less.

Our second department is known as the Contract Department. Contract handles larger, more complex jobs with numerous openings (hospitals, high-rise offices, schools, hotels, etc.) Typically, these jobs require submittal packages for architect approval, comprehensive job estimates and ongoing project management. In addition to estimation, the contract department also provides an engineering service to ensure the opening meets all specifications including fire and sound requirements.

In addition to the full service offered by the contract department, we are also a licensed fire labeling facility recognized by Intertek / Warnock Hersey, Int'l. and can modify and label our wood doors, hollow metal and pre-finished doors and frames "in house" to satisfy most of your fire-rating requirements.

All the other stuff...

With a knowledgeable staff, great customer service and an impeccable reputation within the industry, Thompson Door & Frame is the logical choice for doors and frames. For even greater convenience, Thompson Door & Frame is adjacent to Thompson Construction Supply; the one-stop shop for hardware tools and materials used by contractors everywhere.

Come in and see the difference. And if you can't make it here, we will gladly deliver to your site or you may will-call your items at a Thompson Building Materials nearest you.
